Zeeshan Ahmad

PRINCIPAL AI ENGINEER | FULL STACK ARCHITECT | MS IN COMPUTER SCIENCE (AI)

zeeshanahmad.dev • zeeshan.ahmad.career@gmail.com • +91 9620262624 • LinkedIn • GitHub

Principal Member of Technical Staff at Oracle with over 10 years of experience and a **Master of Science in Computer Science (AI Specialization) from Georgia Institute of Technology**. Consistently recognized as a top performer with a 5/5 excellence rating, I specialize in architecting **intelligent software systems** and full-stack solutions. My expertise spans building **AI-powered dataflow assistants** to engineering scalable cloud products, leveraging technologies like **Frontier LLMs, MCP, and Prompt Engineering** to drive high-impact innovation.

EDUCATION

Georgia Institute of Technology
Atlanta, GA | MS in CS (AI)
2023 – 2025 | **GPA: 4.0 / 4.0**
VIEW DIPLOMA →

Ramaiah Institute of Technology
Bangalore, India | BE in CS
Bachelor of Engineering (2015)

PRODUCT FOCUS

ORACLE PORTFOLIO

Oracle Analytics Cloud (OAC): Semantic Model, Dataflows, Datasets.

SAP PORTFOLIO

SAP Analytics Cloud (SAC), SAP Lumira Discovery.

TECHNICAL PROFICIENCY

AI & INTELLIGENCE SYSTEMS

Multi-Agent Orchestration, Model Context Protocol (MCP), LLMs (Claude, GPT, Gemini), Prompt Engineering, RAG, NLP.

CORE ENGINEERING

Java, JavaScript, Python, TypeScript, Node.js, Spring Boot.

CLOUD & INFRASTRUCTURE

Next.js, React, Supabase, Docker, SAP Cloud Foundry, CI/CD, MongoDB.

PROFESSIONAL EXPERIENCE

Oracle India, Bangalore
Sept 2023 – Present

Principal Member of Technical Staff

- **Autonomous Multi-Agent Orchestration:** Designed and delivered an AI orchestrator for Oracle Analytics using **MCP SSE transport**; enabled goal-to-action automation via agent-to-agent routing and error-aware control flow.
- **MCP Tooling Development:** Designed and implemented server-side Model Context Protocol tools in Java, defining contracts with typed request/response models and OA REST API integration.
- **AI Dataflow Assistant:** Led core team in developing an AI assistant from scratch, allowing users to author dataflows using natural language prompts.
- **LLM Optimization & Accuracy:** Engineered Python communication layer for LLMs to represent complex dataflows, reducing token consumption while applying **Chain-of-Thought (CoT)** reasoning to enhance output accuracy.
- **AI Quality Assurance:** Created AI agents to automatically detect subtle prompt bugs and benchmark responses against paraphrased utterances.

Oracle India, Bangalore
Jan 2021 – Aug 2023

Senior Member of Technical Staff

- **Modernized Core Architecture:** Overhauled the Semantic Model Joins infrastructure and integrated **Lucene Search** to radically improve workspace object discovery.
- **Engineered Latency Reductions:** Implemented dynamic fetching strategies for child-node data, achieving an **80% improvement** in search responsiveness.
- **Standardized Engineering Rigor:** Developed a comprehensive JUnit framework utilized by a 15-member team to ensure mission-critical stability.

GRADUATE SPECIALIZATION

- Natural Language Processing
- Knowledge-Based AI
- AI Ethics & Society
- Robotics: AI Techniques
- Artificial Intelligence
- Game AI
- Software Development Process
- Data Analytics & Security
- Intro to Cognitive Science
- Global Entrepreneurship

HONORS & IMPACT

VP Award Winner
SAP Labs India

Top Tier Performer
Oracle 5/5 Excellence Rating

CAREER HISTORY

SAP Labs India, Bangalore

Aug 2015 – Jan 2021

Developer / Associate Developer

- **SaaS Product Engineering:** Directed the UI lifecycle for the Cloud Translation Service using Node.js and SAP UI5.
- **Distributed Systems:** Developed resilient Java Spring Boot microservices deployed on SAP Cloud Foundry.
- **Strategic Support:** Served as the primary technical lead for global customer escalations, resolving critical root causes for Fortune 500 clients.

PERSONAL VENTURES & PROJECTS

DocScale | Healthcare B2B SaaS

DOCSCALE.IO →

Architected a scalable multi-tenant platform using **Next.js** and **Supabase**. Integrated Clerk for enterprise auth and automated provisioning workflows via Edge Functions.

KeepMacAwake | Native macOS Utility

KEEPMACAWAKE.APP →

Designed and deployed a native Python-based utility to manage system power states, successfully acquiring over **100+ active users**.

Birthday Reminder Pro | Automation

ROUTINEHUB.CO →

Engineered an intelligent iOS automation with **150+ downloads**; features year-agnostic logic for accurate contact event management.

PUBLICATIONS & CERTIFICATIONS
