Ramaiah Institute of Technology

BE in Computer Science

Bangalore, India · 2015

Honors

Top Performer · Oracle

Highest performance rating across four consecutive annual review cycles

AI & Agentic

- LangGraph
- Multi-Agent OrchestrationMCP
- ReActHITL Checkpoints
- LLM Evaluation
- Prompt EngineeringAI Guardrails
- Context OptimizationNLP

Languages

- PythonJavaTypeScript
- JavaScriptNode.js

Frameworks & Infra

- ReactNext.jsDockerCI/CD
- LuceneREST APIsgit

Products

- Oracle Analytics Cloud
- SAP Analytics CloudSAP Lumira

Principal-level software engineer with **10+ years of experience** building AI-powered enterprise products, agentic workflows, and LLM-based platform capabilities. Designed and built LangGraph-based multi-agent workflows, MCP-powered agent runtimes, LLM evaluation pipelines, and context-optimization layers at Oracle Analytics. Holds an **MS in CS (AI specialization) from Georgia Tech with a 4.0 GPA**, bringing together hands-on product delivery, strong systems thinking, and technical leadership in applied AI.

Professional Experience

Oracle India, Bangalore

Sept 2023 – Present

Principal Platform Software Engineer

- LangGraph Workflow Orchestration:** Built a stateful orchestration layer for Oracle Analytics semantic modeling, translating user requests into phased execution plans and routing them across specialized subagents with checkpointed state, human-in-the-loop (HITL) interrupts, and retry/replan control flow.
- Codex Plugin & Agent Runtime:** Built a Codex plugin for Oracle Analytics with MCP-based tools and hooks, enabling natural-language-driven semantic-model workflows with execution guardrails, validation, and more reliable agent behavior.
- AI Dataflow Assistant:** Led development of an AI assistant from the ground up that enabled users to author Oracle Analytics dataflows using natural language.
- LLM Context & Response Optimization:** Engineered a Python-based communication layer and Python-like intermediate representation for complex dataflow state, reducing token usage and improving response quality for multi-step workflow generation.
- AI Evaluation & Reliability:** Built evaluation workflows and benchmarking harnesses to detect prompt regressions and validate response quality across paraphrased and multi-step user requests.

Oracle India, Bangalore

Jan 2021 – Aug 2023

Senior Member of Technical Staff

- Core Architecture Modernization:** Overhauled the Semantic Modeler joins architecture and integrated Lucene-based search, significantly improving workspace object discovery and developer productivity.
- Scalable Undo/Redo & Selective Indexing:** Designed a Git-backed undo/redo framework for Semantic Modeler with selective Lucene reindexing, reducing memory pressure and avoiding full-workspace restore costs.
- Performance & Engineering Rigor:** Improved semantic-model responsiveness through targeted data-fetching optimizations and established a reusable JUnit test framework adopted across the team.

SAP Labs India, Bangalore

Aug 2015 – Jan 2021

Developer → Associate Developer

- SaaS Product Engineering:** Directed the full UI lifecycle for the Cloud Translation Service using Node.js and SAP UI5.
- Distributed Systems:** Developed resilient Java Spring Boot microservices deployed on SAP Cloud Foundry.
- Technical Leadership:** Primary technical lead for global customer escalations, resolving critical root causes for Fortune 500 clients.

GRADUATE COURSEWORK

- Natural Language Processing
- Knowledge-Based AI
- Artificial Intelligence
- AI Ethics & Society
- Robotics: AI Techniques
- Game AI
- Data Analytics & Security
- Intro to Cognitive Science
- Software Dev Process
- Global Entrepreneurship

AGENTIC PATTERNS

- Stateful graph orchestration
- Subagent specialization
- HITL interrupts & approval
- Checkpoint & replan loops
- Token / context compression
- Prompt regression testing
- MCP tool & hook design
- Execution guardrails

CERTIFICATIONS

- Prompt Engineering for Generative AI
- SAP Certified Associate

PERSONAL VENTURES & PROJECTS

ZeroWebTools — Privacy-First Browser Tool Suite

zerowebtools.com

Built a suite of **55+ browser-based utilities** (PDF processing, developer tools, image editing, AI tools) running **100% client-side via WebAssembly**. Designed a shared **TypeScript core library** used by both the web app and a companion Chrome Extension.

DocScale — Healthcare B2B SaaS Platform

docscale.io

Architected a **multi-tenant platform** for healthcare clinics using React/Vite + Next.js SSR, with domain-based tenant routing, **PostgreSQL Row Level Security** for data isolation, and Clerk for B2B auth and role-based access control.

KeepMacAwake — Native macOS Utility

keepmacawake.app

Native **Python + Quartz CoreGraphics** macOS menu-bar app preventing system idle via synthetic HID events. Organically reached **100+ active users** with zero paid acquisition.
